

PowerSchool & K12 Process Orchestration

Maximizing the Potential of Your
Finance System

PowerSchool and Informed K12

How forward-thinking districts streamline business operations by pairing PowerSchool with K12 process orchestration

PowerSchool's BusinessPlus and eFinancePlus systems are a trusted foundation for many school districts' finance operations. As a **system of record**, they are built to manage core data functions like payroll and accounting — and they do that well.

But as district leaders know, **recordkeeping alone doesn't complete the job**. Processes like extra duty timesheets, reimbursements, travel requests, and personnel requisitions involve **complex approvals, compliance risks, and cross-functional collaboration** that require flexibility beyond what PowerSchool is designed to provide.

That's where Informed K12 comes in.

PowerSchool & Informed K12: Better Together

Informed K12 is a **purpose-built K-12 workflow platform** that complements PowerSchool's resource planning tools. Think of it as the **“action layer”** that intersects with your PowerSchool system of record, orchestrating critical finance processes before data gets imported.

Case Study: Yakima School District Reduced Timesheet Processing by 95%

Yakima School District used to spend over **40 hours per pay period** manually entering timesheets into their ERP. After implementing InformedK12:

- Time to process dropped to under **3 hours**
- Scripts identified duplicate timesheet entries and wrong budget codes—saving \$100k in their first year alone
- Payroll gained visibility into status and audit history

Now, extra duty and overtime workflows run smoothly—and their ERP receives clean, validated data without manual entry.

Common Process Gaps with PowerSchool

District teams who rely on BusinessPlus and eFinancePlus often run into process challenges:

- **Lack of functionality for complex workflows**, creating a mix of paper, one-off forms, and email outside the ERP
- **Rigid routing** that doesn't match how approvals work in real life and is hard to update
- **Limited parent/staff accessibility** due to poor mobile experience
- **No visibility** into timesheets in progress, leading to bottlenecks or delayed forms
- **Siloed views**, with no visibility for HR and other departments

These aren't flaws — they're simply outside the scope of what PowerSchool's ERPs were designed to handle. InformedK12 complements it by handling the orchestration, automation, and end-user experience.

Benefits of PowerSchool & K12 Process Orchestration

- **Gain visibility** into every step, including pending requests
- **Find discrepancies** before they are a problem
- Maintain **audit-ready** documentation from initial submission to final approval
- Keep PowerSchool as your **source of truth**
- Handle complex, non-linear approvals with ease
- **Reduce manual entry** and improve audit readiness
- Give users a more **modern, intuitive experience**
- Streamline **pre-approvals** with mobile-friendly forms

Key District Workflows on Informed K12

- Extra duty and overtime timesheets
- Reimbursements and mileage forms
- Personnel requisitions
- Special education supplemental pay
- Travel authorizations
- Impact Aid verification
- Any custom form process that requires approvals

These processes stay aligned with your PowerSchool data model.

Districts Need to Extend PowerSchool—Not Replace It

BusinessPlus and eFinancePlus handle your core data. Informed K12 handles **the people, processes, and paperwork** that move data across your district.

Together, we ensure:

- Less rework and frustration for staff
- Better internal controls and audit readiness
- Faster service delivery to employees and departments
- Stronger ROI from PowerSchool’s existing systems

Over 450 districts—including many of PowerSchool’s most innovative users—choose Informed K12 to help them work smarter, not harder.

 InformedK12 = People, Processes, Paperwork

 PowerSchool = Core Data

Want to See What PowerSchool & InformedK12 Looks Like?

Let us show you how we complement your PowerSchool system and unlock better workflows without changing your core ERP.

We'll walk through how we support your most critical, high-volume forms—**extra duty pay, reimbursements, travel, personnel**—and how it all connects back to BusinessPlus or eFinancePlus.
